

CSA1507-Cloud Computing and Big Data Analytics

Experiment-1

Aim:

Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

Procedure:

1. Open the Zoho Creator cloud platform and create a new application.
2. Create a Car Booking Reservation System application.
3. Design a booking form with fields such as:
 - From
 - To
 - Search for Cabs
 - Rental
 - Out Station
 - Package Type
 - Hours / Days
4. Add cab details such as Cab Type, Availability, and Fare.
5. Configure the form to accept booking details from users.
6. Create suitable reports/views to display available cabs and booking information.
7. Configure the application to calculate or display the booking and fare details.
8. Test the application by entering different source, destination, rental, and package details.
9. Publish the application through Zoho Cloud so users can access it through a web browser.

10.Demonstrate SaaS by allowing users to use the car booking application online without installing the software locally.

Implementation

Input:

Book a Cab

Result:

The Car Booking Reservation System was successfully created and deployed using Zoho Creator as a cloud-based SaaS application. The system allows users to search and book cabs by entering From, To, Rental, Out Station, Package Type, and Hours/Days. The application was tested successfully and accessed through the cloud without requiring local installation.
